

## EDUCATION

**Master of Science in Computer Science, Dakota State University**, South Dakota, SD; GPA – 3.9 December 2019  
**Bachelor of Engineering in Computer Engineering, Kathmandu University**, Nepal; GPA - 3.16 June 2015

## WORK EXPERIENCE (4 YEARS)

**Dakota State University, Madison, SD** January 2019 - December 2019  
**Research Assistant**

### NSF Cyber-Training Project

- Designed a website prototype for Dakota State University Cyber-Lab using Laravel Framework, MySQL, AWS API that provides the students with virtual computing lab services which can be accessed anytime, anywhere.
- Performed the application testing and deployed the application to web server using Apache2.
- Presented tutorial on launching AWS EC2 instance, PuTTY configuration, LAMP installation.
- Assisted undergraduate students to setup equipment for Internet of Things security research work.

**Rigo Technologies, Nepal** March 2018 – December 2018  
**Software Engineer**  
**Technologies Used:** .NET Core, REST API, PostgreSQL, Dapper, Entity Framework Core, HTML5, CSS, ReactJS, Git

- Served as team leader for back-end developer providing technical ideas to develop quality code.
- Developed E-Learning site using .NET Core, PostgreSQL, Entity Framework Core, Dapper, ReactJS.
- Team player to research new technologies that will increase development productivity and application performance.
- Built asynchronous web services using REST API, LINQ, Entity Framework Core to handle numerous requests.
- Created Web Hook to automatically synchronize video interaction data to the system on specific event calls.
- Supervised junior engineers, interns providing technical guidance and involved in performance reviews.

**Spiralogics Inc, Nepal** April 2016 - September 2017  
**Mid-Level Software Engineer**  
**Technologies Used:** .NET MVC, SQL, Entity Framework, LINQ, HTML5, CSS, jQuery, DevExpress, SVN, TDD, Agile

- Involved in creating solution design and development of the worker compensation and HealthCare project.
- Followed Agile Methodology to work on sprint deliverables including regular stand-up meeting, sprint planning.
- Optimized the database performance by creating stored procedures, views, functions to handle complex SQL queries.
- Designed ETL automation module with data validation and email notification that minimized the workload by 80%.
- Responsible for deploying the verified modules to IIS server.
- Implemented Entity Framework (EF), LINQ to simplify CRUD operations reducing development time and cost.

**Verisk Information Technologies** September 2015 - April 2016  
**Software Engineer Intern**

- Constructed HealthCare Report Generating Parser using C#, XML that expedited document parsing by 25%.
- Implemented ASP.NET MVC to develop healthcare application modules and performed unit testing using N-Unit.

## TECHNICAL SKILLS

<b>Programming Languages / Framework:</b>	C, C# .NET 4.5, OOP, ASP.NET Core, ASP.NET MVC, Web Forms, WinForms, WPF, ADO.NET, REST API, LINQ, Web Services, HTML5, CSS3, Bootstrap, DevExpress, jQuery, JavaScript, AJAX, JSON, ReactJS, Python, Dapper, EF6
<b>Database &amp; Data Warehousing Tools:</b>	SQL, MySQL, PostgreSQL, Oracle, PL/SQL, SSIS, SAS, Weka, SQL Profiler
<b>Application IDE Tools:</b>	Visual Studio, Visual Studio Code, Sublime Text, POSTMAN, Workbench
<b>Testing Environment:</b>	MS Unit, N-Unit, Selenium, Test-Driven Development
<b>Version Control:</b>	SVN, GitHub, Git, Bitbucket, Azure DevOps
